

*Fusing the best technology with unsurpassed service and support*

## FusionStorm: One single point of contact

At FusionStorm, we believe providing effective technology solutions is as much about people as hardware and software.

In fact, our most important expertise of all is listening to clients and responding quickly to changing needs.

That's why hundreds of organizations large and small have trusted FusionStorm to provide a wide range of IT solutions and services from one single point of contact.

### Objectives-based solutions from leading vendors

From needs assessment and planning to deployment and support, FusionStorm offers expertise that's both deep and broad — with certifications and established alliances with some of the world's leading top-tier vendors.

Whether your needs call for expert assistance with planning and deploying a new IT initiative or complete 24x7 support through our dedicated NOC, you'll find FusionStorm provides a full range of both professional and managed services that help you focus on saving time, cutting costs, and growing your business.

## What our customers have to say...

"We were able to leverage FusionStorm's experience and knowledge...They've just been phenomenal. What they say they can do, they do."

**Steve Rogers**  
Senior Manager of IT Operations  
PDL BioPharma

"FusionStorm went above and beyond the call of duty. They did their homework up front, knew exactly what we needed and provided a detailed project plan."

**Herman Brown**  
IT Manager  
Young & Rubicam, San Francisco

"We viewed many hosting facilities, but FusionStorm was the only one that had experience — huge experience — in every technology we asked for."

**Ido Shilon**  
Director of Engineering  
MeeVee

## The FusionStorm difference:

### Business-driven scalable solutions

As part of our proven 4-step process, we assess your business and IT objectives to make sure your technology meets today's needs – and will scale for future growth.

### Expert advice. Less decision-making stress.

Call on our consultants to help you evaluate your alternatives, analyze the impact on your entire infrastructure, develop a budget, and build a business case for the right solution.

### A multi-vendor approach to solving IT challenges

Through alliances and partnerships with dozens of leading vendors, we can always provide technology based on your objectives — not the other way around.

### Clear roadmap to meeting requirements

We deploy based on a comprehensive plan that includes thorough testing to assure that all business, functional, and service level requirements are met.

### Streamlined path from inception to completion

Through a detailed planning and implementation process, we mitigate risk to assure a smooth deployment with minimal disruption.

### FusionStorm: Making Technology Work

With IT initiatives posing more risk of higher costs and longer delays, call FusionStorm for award-winning technology, the expertise to help you make the most of it, and award-winning service and support.

San Francisco (HQ) • San Jose • Sacramento • Los Angeles • Las Vegas • Cincinnati • Chicago • Boston • Tampa • Boca Raton

### Added support to enhance your team

When internal resources are swamped, call FusionStorm for specialized expertise as needed — or take advantage of complete turnkey managed services to provide significant cost savings.

### Partnerships with industry-leading vendors

FusionStorm engineers are certified with technology partners that represent the top-tier of vendors worldwide. Call us for the latest technology and the expertise to use it to full advantage. Our partners include:

And dozens more...
