

>FusionStorm & Oracle

FusionStorm is an Oracle Certified Partner, with over 10 years of experience, delivering tailored Oracle solutions to hundreds of companies across the country.

>The Oracle Database (8, 8i, 9i, 10g)

FusionStorm employs a substantial staff of Oracle Certified Professionals (OCP) - the industry's only certification that signifies a proven level of knowledge and expertise on Oracle's leading Internet products.

FusionStorm consulting services specialize in the following areas:

- Oracle Database Design/Installation/Configuration/Advanced Tuning (8i, 9i & 10g)
- Oracle Data Warehouse Design, Development and Deployment
- Data Conversion from other databases and data sources to Oracle
- Capacity Planning (Disk, CPU, Memory Sizing for Oracle Servers)
- Upgrades from 8i/9i to 10g
- High Availability deployments including RAC, Data Guard and Traditional Standby Server Advanced Replication
- Grid Control Implementation

>Oracle Application Server (9i & 10g)

FusionStorm supports Oracle Application Server products back to version 3.0 and provides full consulting and implementation services including:

- Review current web/application server configuration and future needs
- Install and set up of Oracle Application Server
- Form migration plan to Oracle Application Server, if not currently in use
- Provide detailed recommendations and implementation services for all modules of Application Server including Portal, Web Cache, J2EE, Discoverer, Reports, Forms, OID, etc.
- Complete hardware/software implementation support services
- Conversion of legacy Java applications, forms and reports to Oracle Application Server

>Oracle Collaboration Suite (9i & 10g)

Since the introduction of Collaboration Suite, FusionStorm has done more successful installations than any other partner in the Bay Area. Looking towards the new version of 10g, FusionStorm is poised to support all Collaboration Suite opportunities through experienced and battle-tested presales and implementation services. Product demos and ongoing access to FusionStorm's OCS environment can be provided to customers. In addition, FusionStorm's strong IP Telephony and Storage practice help provide integrated solutions to ensure successful implementations.

Collaboration Suite services include:

- Assessment of existing messaging/collaboration software versus OCS for price and features
- Migration planning and execution for implementing Collaboration Suite
- Architecture design and capacity planning for OCS environment
- Full installation services for all Collaboration Suite components
- Client Administrative and end user training

>Application Development Services

FusionStorm engineers and project managers specialize in client server and Web technologies on PC and UNIX platforms. We are involved in every phase of database/application development, from analysis, design and planning to production and benchmark testing. FusionStorm primary expertise is J2EE application architecture, design and development. Application Development services include:

- Project Management
- Detailed Business Requirements Analysis
- J2EE architecture, design, modeling and development
- Application deployment to Oracle Application Server
- High Availability deployments including clustering and load balancing
- Stress Testing and Capacity Planning
- Ongoing 24x7 management and support
